Creating a User Account in the Provider Web Portal

Enrolled Providers p.1-5

New/Re-Enrolling Providers p. 6-8

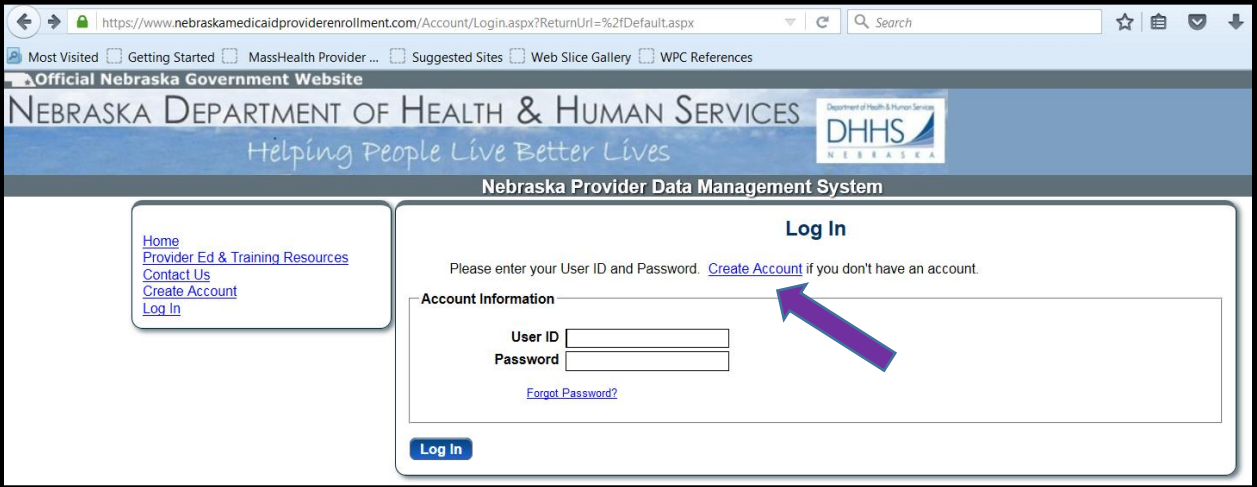

Attention: To update your enrollment information or add/remove a group member, you must first activate the Account associated with the assigned Nebraska Medicaid ID. The steps below will guide you through the process of creating a User Account.

Providers with Group Members: A group must activate their User Account prior to adding/removing a group member.

To add group member who is not currently enrolled in Nebraska Medicaid: The Individual Provider must set up their Group Member Profile by creating a new account with their SSN, not the Group's Tax ID.

Once the Individual Provider enrollment has successfully passed the review and screening process, they can be added to a Group.
